DETAILED ACTION

1. **Please Note:** In an effort to enhance communication with our customers and reduce processing time, Group 1640 is running a Fax Response Pilot for Written Restriction Requirements. A dedicated Fax machine is in place to receive your responses. The Fax number is 703-305-3704. A Fax cover sheet is attached to this Office Action for your convenience. We encourage your participation in this Pilot program. If you have any questions or suggestions please contact Paula Hutzell, Supervisory Patent Examiner at Paula.Hutzell@uspto.gov or 703-308-4310. Thank you in advance for allowing us to enhance our customer service. Please limit the use of this dedicated Fax number to responses to Written Restrictions.

2. ***Election/Restriction***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 40-53, drawn to a method for regulating homeostasis of a cell comprising contacting the cell with a compound that regulates the activity of a MEKK protein, classified in class 435, subclass 7.1 for example.
- II. Claim 53-64, drawn to a method for regulating apoptosis of a cell comprising contacting the cell with a compound that regulates the activity of a MEKK protein, classified in class 435, subclass 7.1 for example.

The inventions are distinct, each from the other because of the following reasons:

The methods of Inventions I-IV are distinct from each other because they are independent, using separate method steps, active agents and having different effects.

Art Unit: 1646

Because these inventions are distinct for the reasons given above, restriction for examination purposes as indicated is proper. A search of the art for Inventions I-II would not be co-extensive with each other. Because the searches required for these inventions are not co-extensive an examination of the materially different, patentably distinct inventions in a single application would constitute a serious burden on the examiner.

The claims of group I-II are drawn to a multitude of nucleic acids derived from the (SEQ ID NO:1, 3, 5, 7, 9, 11, 13), polypeptides (SEQ ID NO:2, 4, 6, 8, 10, 12, 14). The claims apply to numerous MEKK nucleic acids and their encoded polypeptides. This constitutes recitation of an implied, mis-joined Markush group that contains multiple, independent and distinct inventions. Each of the different nucleic acids/polypeptides and methods of their use are independent and distinct because no common structural or functional properties are shared. Accordingly, these claims are subject to restriction under U.S.C. § 121. Upon election of Groups I-II, Applicants is additionally required to elect a single nucleic acid or polypeptide. This requirement is not to be constructed as a requirement for election of species, since each of the compounds recited in alternative form is not a member of a single genus of invention, but constitutes an independent and patentably distinct invention.

An election to prosecute one of the groups listed I -II must be made. Affirmation of this election must be made by applicant in responding to this Office action.

Art Unit: 1646

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently
5 named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
